About me

I am an Industrial Engineer and Full-Stack Java Developer (Generation México, Cohort 59). I combine process improvement and analytical thinking with development in Java, JavaScript, SQL, and HTML/CSS (Bootstrap), version control with Git/GitHub, and clear documentation. I translate business requirements into measurable technical solutions that reduce errors and support decision-making, while deepening my knowledge in Cloud and Data Analysis.

Hard Skills

HTML | CSS | MySQL | SQL Server | JavaScript | Bootstrap | Java | Python | Git/GitHub | Cloud Computing (GCP)

Soft Skills

Effective communication | Teamwork | Problem-solving | Analytical thinking | Continuous learning

Academic Project

Full-Stack Java Developer | E-commerce for Dog Prosthetics

August 2025 – November 2025

Collaborative creation of an e-commerce website for the sale of dog prosthetics, using tools and languages such as HTML, CSS, JavaScript, Bootstrap, Java, SQL, and Git/GitHub for web development.

Applied soft skills: teamwork, leadership, and effective communication.

Professional Experience
